

An unexpected surprise! GCMM delivered 13 tons of pizza donated by a German charity in March. This was a one-time gift to families with children in frontline villages in Eastern Ukraine. Photo above: One hundred families lined up to receive food boxes.

Dear Ukraine Aid Ministry Friend!

First, a warm thank you for your financial support this past winter. Ukraine has survived the bitter, freezing temperatures of winter, and many left without power or running water. Russia has continued

its indiscriminate bombings and terror. The strategy was to deprive Ukrainians of the very essentials needed to sustain life.

Essential Number One: Wood-Burning Stoves

In the heart of winter, GCMM delivered wood-burning stoves, generators, and backup power units to thousands of households, supplying them with warmth and electricity.

In addition, we distributed food, potatoes, carrots, onions, flour, food parcels, and canned goods to families in frontline villages. The deliveries also included woollen socks, shoes, and protective clothing.

We continue to deliver wood-burning stoves nonstop, all manufactured at two metalwork facilities, one in Kyiv and the other in the frontline city of Zaporizhzhia.

Thanks to your support this past fall and winter, we have funded 3,000 additional stoves. Since the fall of 2022, we have delivered approximately 20,000 stoves in total.

Nonstop delivery of wood-burning stoves

Recently we ordered another 1,000 stoves. On behalf of Ukrainian families, please accept theirs and our deepest gratitude for your part in making this possible. The need is urgent. Fundraising is ongoing, as we continue to receive new requests for wood-burning stoves faster than we can produce them.

With next winter's challenges already on the horizon, the wood-burning stove factories are ready to continue production throughout the spring, summer, and fall. Since production takes time, stoves must be made well in advance to ensure emergency aid can reach people quickly when winter arrives.

Briquettes and Firewood Distribution

During the winter, we also obtained many truckloads of briquettes and firewood, especially for residents of the Kherson and Odesa regions. These areas have limited tree cover.

As of this writing, we have delivered more than 5,000 fire extinguishers to the Sumy, Kharkiv, Zaporizhzhia, and Kherson regions.

As part of our food assistance, we purchased vegetables from local farmers in Ukraine. In the last quarter alone, we acquired approximately 200 tonnes of root vegetables, potatoes, carrots, onions, and flour for villages in eastern Ukraine.

Prepared food parcels were also delivered to thousands of families with children, including children in orphanages.

Ambulances

The five high-quality ambulances we secured for military hospitals in the Kharkiv region are serving well, and we have received especially warm and heartfelt thanks from the medical unit of the Kharkiv Border Guard for this support. Additional deliveries have included hospital beds, wheelchairs, and first aid supplies.

Every gift has helped ease the suffering of thousands of people this winter. Thank you.

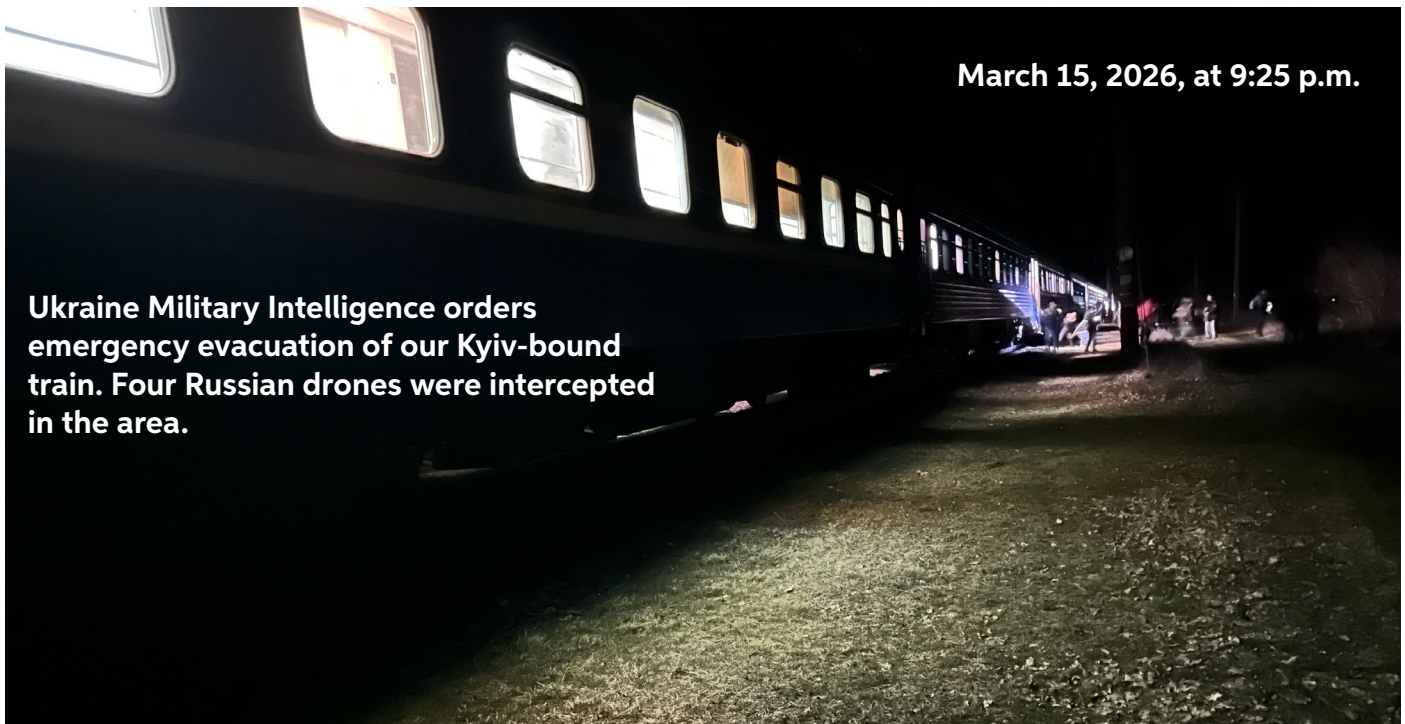

The five life-saving ambulances serving military hospitals in the Kharkiv region are already making a difference. The medical unit of the Kharkiv Border Guard is very grateful for the support.

Over the winter, we delivered multiple truckloads of briquettes and firewood to residents in the Kherson and Odesa regions, where tree cover is scarce.

These ambulances save lives by evacuating dozens of wounded civilians and soldiers every day from the war zone to hospitals. More ambulances are urgently needed; each costs about C\$16,000-C\$32,000 delivered.

March 15, 2026, at 9:25 p.m.

Ukraine Military Intelligence orders emergency evacuation of our Kyiv-bound train. Four Russian drones were intercepted in the area.

Russia attacks the main railway line between Kyiv and major eastern Ukrainian cities. On March 15, 2026, Ukrainian Military Intelligence sent an emergency order to stop our train. The train was stopped, and passengers were evacuated immediately as four kamikaze drones approached. Hundreds of passengers abandoned the train in sub-zero temperatures and pitch darkness in a forested area. After 30 minutes in the cold, the danger had passed, and we were allowed to board the train and continue to Kyiv.

Four Years of War!

During the war, 140,000 Ukrainian soldiers (dads, husbands) have lost their lives. The average age of soldiers serving in the army is 43.

Most of the men and women who have lost their lives in the war were married and had families. Additionally, current statistics indicate that 59,000 children are without their biological father or mother.

Russia's war strategy has changed over the course of these four years of war. In February 2022, Ukraine halted the advance of Russian ground forces toward Kyiv. Since then, Russia has occupied only small slivers of several oblasts in eastern Ukraine.

In the past year, Russia has shifted to bombing hospitals, supermarkets, high-rise apartment

buildings, and gas stations. Russia has continued the step-by-step destruction of the country's thermal power plants, hydroelectric power stations, power grids, natural gas reserves, underground fuel storage sites, and ports.

The country's railways have followed, as they are vital and used by both the public and Ukraine's defense forces.

Russia Sows Despair

City of Kyiv Mayor, Klitschko commented: "The aim of the strikes directed at Kyiv is to break the resistance, break the spirit of Ukrainians, and to do everything possible so that people would sink into depression and despair."

Over the past year, Russia has increasingly targeted hospitals, supermarkets, apartment buildings, and gas stations, while continuing to destroy power plants, grids, gas reserves, fuel storage sites, and ports. These attacks on civilians have aimed to crush Ukrainian morale and drive people into despair.

Easter is behind us. But for Ukraine, the grieving spirit of Ukraine's "Good Friday" continues. Yet we know that Good Friday was not the end of the story. Resurrection Sunday followed. We all hold onto hope that the war may end, God willing, possibly this year.

Until that day comes, Ukraine still needs our help. We will continue humanitarian aid until the country reaches its own resurrection day — a morning of peace, reunited families, blue skies, and golden fields flourishing once again.
